

PROJECT SOLUTIONS

Powering Curitiba, Brazil

Curitiba, in Southern Brazil, is regarded as one of the most prosperous and exciting cities in Brazil. World renowned for its innovative urban solutions, education and environment, its 1.6 million people is a synthesis of eclectic cultures with a thriving future.

However, one of the consequents of this developing Brazilian metropolis is the increase in electricity needs.

The Solution

The requirement was for a new substation, capable of supplying electricity to a new Carrefour supermarket, as well as residential load in the urban area of Curitiba.

Hawker Siddeley Switchgear provided the total solution with a substation comprising of GVR reclosers.

Offering an optimum level of control and protection, the GVR substation fully satisfied all requirements, meeting the increase in Curitiba's electricity demand.

Complete Customer Satisfaction

Pole mounted or substation mounted, the GVR can be integrated into the most advanced distribution automation schemes.

For more information on GVR substation applications and other products from the Hawker Siddeley Switchgear "Fit & Forget" range please visit our website at www.hss-ltd.com.
