

PROJECT SOLUTIONS

Power...When you need it... Where you need it...FAST!

When that unexpected power shortage occurs and supply is needed quickly, customers can now have fast access to power when they need it, where they need it and for as long as they need it.

The Solution

Cummins Power Generation, in partnership with Hawker Siddeley Switchgear, have the solution with a 5MW 'building block' concept - fully, self-contained, containerised mini power stations - housing 13.8kV Eclipse Switchboards.

Each 5MW 'building block' is strategically located to allow for fast availability and can be fully operational in a matter of days.

Each air-conditioned ISO container is ready for immediate cable connection once on site.

This successful substation concept has since feeded power to Baghdad Aiport, the Forum (Baghdad)
www.hss-ltd.com

and supported various other installations for emergency power throughout the Middle East, Iraq and Africa.

Complete Customer Satisfaction

Project Management is recognised as being an integral part in any project. Appointing a dedicated Project Manager, Hawker siddeley Switchgear provided an on-time, technically superb and visually attractive solution to Cummins Power Generation.
