

## PROJECT SOLUTIONS

# GVR..The father of Rural Electrification

Hawker Siddeley Switchgear's continued success with its GVR Recloser includes a 4 year contract from Scottish & Southern Energy plc, for the supply of new GVR reclosers complete with third party communications equipment for full remote control and monitoring.

Worth in excess of £10Million, it is believed to be the largest recloser contract of its kind in the UK, and potentially in the world, reinforcing the GVR's position as the father of modern switchgear.

### The Solution

By establishing a network of strategically positioned GVR reclosers with full remote control and monitoring, Scottish and Southern Energy plc are able to meet the increasing expectations of both their customers and the electricity regulator to improve quality of supply on rural networks.

### Complete Customer Satisfaction

The decision to increase the number of GVR reclosers across the network was straightforward. Having utilised the GVR since its launch in 1994, Scottish & Southern Energy plc fully recognised the enviable accomplishment of the GVR of reducing Customer Minutes Lost.

For more information on the GVR and other products from the Hawker Siddeley Switchgear "Fit & Forget" range please visit our website at [www.hss-ltd.com](http://www.hss-ltd.com).
