

PROJECT SOLUTIONS

Critical Power

Helping and saving lives is all in a day's work for hospitals. However, what we, as patients, take for granted is the reliability of power that allows the hospital staff to do just that - save lives.

How is this vital continuous power supply ensured?

The Solution

Opened in December 2002, the new Great Western Hospital in Swindon found the answer in Hawker Siddeley Switchgear's Eclipse.

Reliability, quality and integrity are all central to the design of the Eclipse making it the ideal choice for critical life or death applications with a need for a constant uninterrupted supply with minimal and infrequent maintenance.

Accidental actions and misuse of a piece of switchgear can result in disaster for any hospital so simplicity and

safety are paramount. With the Eclipse, only compatible and safe operations are possible.

Complete Customer Satisfaction

Hawker Siddeley Switchgear continue to build their expert reputation in National Health Services applications supplying a number of new hospitals with a continuous and reliable power supply.

For more information on the Eclipse and containerised switchgear from the Hawker Siddeley Switchgear product range please visit our website at www.hss-ltd.com.
