

PROJECT SOLUTIONS

Horizon - Industrial power

The limitations of outdoor electrical distribution equipment are regularly tested in many industrial applications, not least the petrochemical industry. Often required to operate in areas where corrosion and environmental conditions are extreme, outdoor equipment must be robust, reliable and capable of operating with less than normal maintenance.

The Solution

Innovene - one of the largest petrochemical concerns in the world - chose Hawker Siddeley Switchgears' acclaimed Horizon Outdoor Circuit Breaker for their substations.

Ideally suited for these harsh industrial conditions, the Horizons' unique aluminium casting, containing the breaker mechanism and vacuum bottles, is impervious to such environmental conditions.

The breaker mechanism itself utilises one of the most advanced operating mechanisms in the market today - the 'fit and forget' magnetic actuator technology - offering Innovene supreme reliability and minimal maintenance throughout its lifetime.

Complete Customer Satisfaction

In an industry where reliability is essential, Innovene chooses the Horizon, confident that their power is in safe hands.
