

## PROJECT SOLUTIONS

# Powering the Underground

**The London Underground is the oldest and one of the busiest underground railway networks in the world. Today, it is a major business handling over 3 million passenger journeys a day, some 500 trains at peak time, owns 253 stations (275 served), employs over 12,000 staff and owns vast engineering assets.**

**Reliability of power is a must.**

### The Solution

Hawker Siddeley Switchgear continues its success with London Underground, supplying 2x, MM74 630V DC Switchboards - totalling 34 panels - for their latest investment project (Wood Lane).

Part of the London Underground Ltd private finance initiative, the requirement was to provide an expert, technically astute solution and an assurance to ensure a constant reliable DC power supply to the London Underground.

With almost 80 years DC design excellence and manufacturing experience, Hawker Siddeley Switchgear provide the complete solution to London Underground with the MM74 DC Switchgear.

### Complete Customer Satisfaction

In the last 5 years, Hawker Siddeley Switchgear has supplied over 450 MM74 DC panels to London Underground, building on a strong, successful working relationship and a continuing future partnership.

For more information on the MM74 and other DC Switchgear from the Hawker Switchgear product range, please visit our website at [www.hss-ltd.com](http://www.hss-ltd.com).
