

## PROJECT SOLUTIONS

# Powering Rural New Zealand

**The remote outdoors of New Zealand 's North Island, Gisborne, can offer the most challenging and contrasting of environments - how do you guarantee a reliable power supply to such a rural network?**

### The Solution

Hawker Siddeley Switchgear provided Eastland Network Ltd with the ideal solution - a substation comprising of 4 GVR circuits.

Requirements were to improve the continuity of their power supply whilst reducing operational costs - the GVR excelled in both these requirements.

Due to the rurality of the network, optimum level of control and protection was required. The Panacea relay had the ability to meet these specific protocols from Eastland Network Ltd providing them with an overall improved distribution network.

### Complete Customer Satisfaction

Eastland Network Ltd were so impressed with the performance of the GVR that they now have 3 such substations installed on the island.

For more information on the GVR and other products from the Hawker Siddeley Switchgear "Fit & Forget" range please visit our website at [www.hss-ltd.com](http://www.hss-ltd.com).
