

PROJECT SOLUTIONS

Reliable power in Canada

One of the largest electric utilities in Canada, BC Hydro delivers electricity to over 94% of British Columbia's population.

Having constructed an efficient, world-class integrated hydroelectric system, BC Hydro is regarded as a world-leading, sustainable energy company - delivering electricity in an environmentally and socially responsible way.

The Solution

Hawker Siddeley Switchgear was recently awarded a five-year framework contract to supply BC Hydro with Horizon circuit breakers.

The Horizon will not only be used for new installations, but will also be replacing existing, less reliable, circuit breakers on BC Hydro's network system.

Providing a compact and cost-effective substation solution - the Horizon keeps in line with BC Hydro's policy of being able to provide some of the lowest electricity rates in the world.

The Horizon circuit breaker will become standard for BC Hydro.

Complete Customer Satisfaction

A number of units have already been delivered and further orders are expected in the future.

For more information on the Horizon and other products from the Hawker SiddeleySwitchgear product range please visit our website at www.hss-ltd.com.
